

FOR PAYMENT PROVIDERS

Secure and Compliant Crypto Payment Rails

Proactively prevent fraud, ensure real-time compliance, and build trusted payment experiences across the crypto ecosystem

FOR SECURE ON/OFF-RAMPS

Prevent tainted funds and safeguard user onboarding

Screen counterparties pre-transaction to block illicit funds from entering or leaving your platform, ensuring clean and secure transactions.

FOR REAL-TIME FRAUD PREVENTION

Stop scams & phishing before they impact users

Leverage AI-powered insights and transaction simulation to mitigate fraudulent activities in real-time, protecting your users and your reputation.

FOR CHARGEBACK PREVENTION

Minimize fraudulent transactions and disputes with proactive screening

Identify and block transactions with high-risk addresses and counterparties before they are authorized, reducing the likelihood of costly chargebacks.

FOR AUTOMATED COMPLIANCE

Ensure AML compliance with real-time, cross-chain screening

Automate compliance checks with continuous monitoring for sanctioned entities, mixers, and other risky activities across 60+ chains.

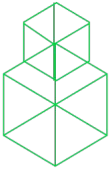

FOR EFFORTLESS INTEGRATION & SCALABILITY

Integrate seamlessly and scale across a growing number of chains

Our APIs and integrations are designed for easy deployment into existing payment flows with scalable infrastructure supporting rapid network expansion.

PRE-TRANSACTION SCREENING

Prevent Fraud and Illicit Activity Before Authorization

Evaluate address risk in real-time with ML-driven analysis, providing a recommendation to allow or deny interactions before they occur.

- Flag involvement in sanctions, exploits, hacks, phishing, scams, mixers, and more across 60+ chains
- Gain a comprehensive understanding of address reputation with cross-chain and multi-hop risk analysis.
- Integrate seamlessly into your frontend user experience without requiring smart contract modifications.

TRANSACTION SIMULATION

Eliminate Blind Signing Risks and Block Malicious Actions

Simulate the outcome of transactions before execution, identifying and blocking potentially harmful activities based on customizable policies:

- Prevent phishing, scams, drainers, and other risky onchain actions before they are confirmed.
- Leverage granular and complex enforcement policies tailored to your specific risk tolerance.
- Integrate effortlessly with leading wallet infrastructure providers like Safe{Wallet}, Fireblocks, and Utila.

REAL-TIME RISK MONITORING

Detect and Respond to Threats with Unparalleled Accuracy

Accurately identify over 300 risk types post-transaction, from security vulnerabilities to market manipulations, with rapid alerting and automated response capabilities.

- Continuously monitor for security, technical, financial, operational, and governance risks.
- Benefit from industry-leading detection accuracy (99.5% of hacks detected) with minimal false positives (<0.001%).
- Leverage ML, heuristics, simulations, and graph-based detections for comprehensive threat intelligence.

AUTOMATED COMPLIANCE

Ensure Continuous Regulatory Adherence

Maintain compliance with real-time, block-level screening against sanctioned entities, mixers, and illicit addresses.

- Go beyond traditional AML solutions with cross-chain and multi-hop risk analysis.
- Utilize a customizable risk engine adaptable to FATF guidelines and local regulations.
- Receive instant updates on address risk, avoiding the latency issues of traditional compliance solutions.

DEPLOYMENT

Future-Proof Your Payment Infrastructure

Integrate our solutions seamlessly into your existing payment flows with minimal disruption and scale your operations across a growing number of blockchains.

- Our API is designed for easy integration, ensuring a rapid deployment process.
- Our scalable infrastructure enables fast onboarding for new network integrations.
- Choose flexible deployment options, including local processing for enhanced privacy and low latency.
